

MICHAEL MOURELATOS

Data & Analytics · Application Development · AI & Automation

Calgary, AB · 403.614.6985 · michaelmourelatos99@gmail.com · linkedin.com/in/michael-mourelatos

PROFILE

Data and analytics professional with 6+ years building data products end to end — and a reputation as the bridge between technical and non-technical teams. Ships production Python analytics applications (Dash, Streamlit), enterprise semantic models, and Databricks pipelines, while leading the conversations that make them land: translating operations, finance, and executive needs into requirements, and complex results into plain language. Team-first by nature — builds the relationships and clear communication that keep cross-functional programs moving, whatever each person's expertise.

CORE COMPETENCIES

Application Development: Python (Dash, Streamlit, pandas), SQL, HTML/CSS, data-layer integration, AI-assisted development (Claude Code, LLM prompt engineering)

Data & Analytics Platforms: Databricks, Snowflake, Microsoft Fabric, dbt, Power BI (DAX, Power Query M), enterprise semantic model design

Delivery & Product: Git branching and environment promotion (dev → UAT → prod), Azure DevOps, Jira, Agile; stakeholder discovery, relationship building, translating technical work into plain language · Fluent in English and Greek

EXPERIENCE

BI Analyst — Data Science & Analytics

2026 – Present

SECURE WASTE INFRASTRUCTURE CORP · Calgary, AB

- Design and ship production analytics applications in Python (Dash, Streamlit) — market-intelligence, price-forecasting, and interactive scheduling tools with SQL-integrated data layers and custom HTML front ends — using AI-assisted development workflows (Claude Code) to compress build cycles.
- Own end-to-end delivery of operational analytics products for an industrial waste and metals-recycling business, from stakeholder discovery through data architecture, reporting, and adoption tracking.
- Led design and delivery of a division-wide asset (bin) tracking analytics product: defined requirements with operations stakeholders, authored the semantic model measure layer, and established usage baselines to measure adoption.
- Re-architected the corporate energy-hedging semantic model — rewrote the data layer and rebuilt 50+ measures — and eliminated systemic data-quality defects in rail logistics reporting, restoring accuracy in figures used daily by operations.
- Delivered a master container-fleet reconciliation linking operational assets to D365 ERP fixed assets, and standardized Git-based dev → UAT → prod promotion for Databricks pipelines.

Business Intelligence Analyst — Data Science

2025 – 2026

SMART TECHNOLOGIES · Calgary, AB

- Delivered interactive dashboards and backend data-pipeline solutions adopted across the business, expanding self-service analytics.
- Led stakeholder requirements sessions; built and owned ETL workflows for large datasets and integrated ML models and AI analytics into the enterprise data factory.

Workforce & Reporting Business Analyst — Operations

2023 – 2025

SMART TECHNOLOGIES · Calgary, AB

- Owned a portfolio of 20+ operational Power BI reports used daily for staffing, workload, and budget decisions.
- Developed a forecasting model achieving 100% accuracy in support-volume estimation; led biweekly forecast reviews with leadership and partnered on efficiency programs generating \$10,000–\$15,000 in monthly savings.

CX Operations Coordinator

2020 – 2023

SEMTECH · Richmond, BC

- Supported an operation handling 10,000+ monthly tickets; built the Power BI and QlikSense KPI tracking used to manage it and drove process improvements using SQL, Excel, and Salesforce.

LEADERSHIP, COMMUNITY & INTERESTS

- Co-Lead, Emerging Professionals ERG (North America) — Semtech, 2021–2023: co-led the region's chapter, running programming and engagement for early-career employees.
- Assistant Coach, Henry Wise Wood HS Rugby (2018–Present) · Player, Calgary Canucks Men's Rugby (2016–Present)
- Outside work: golf, avid NFL & NHL fan, hobbyist algorithmic-trading projects in Python, and proud dog dad.

EDUCATION & PROFESSIONAL DEVELOPMENT

Bachelor of Economics, Minor in Business Management & Society — University of Calgary

2021

20+ professional courses: Python & R, SQL, Databricks & Snowflake, Power BI / DAX / M, LLM prompt engineering, Agile. Certifications in progress: Project Management, Data Analytics.
